## Memorandum

TO : Chief/Intelligence School

FROM : Chief/Management Training Faculty

SUBJECT: Biweekly Activities Report No. 10  
26 April - 7 May 1965

DATE: 10 May 1965

### SUPERVISION #87

Supervision #87 with an enrollment of 20 students concluded Friday, 7 May. This class did not impress us as being as sharp as some of the others we have had. This may be due in part to the heat of the room during the first two days. We are planning some revision of materials for more effective learning by the students.

### SUPERVISORY IN-BASKET EXERCISE

25X1A

██████████ finished her writing of the supervisory in-basket in time for it to be included in Supervision #87. Although she had some assistance and guidance from the instructors, it is essentially her own creation. The exercise in its first running turned out to be quite successful.

### SENIOR SEMINAR

Final administrative details for the 16-21 May Senior Seminar are being worked out. There has been more confusion than is really desirable because of numerous cancellations and substitutions.

### OFFICE OF FINANCE PILOT PROJECT

Phase II has not yet started because we are still attempting to work out dates which satisfy both Fuchs and ██████████. We hope to get started before the end of May.

25X1A

### ROLE-PLAYING COURSE IN NEW YORK

During the period 26-28 April Mr. ██████████ attended a course on role-playing given in New York. Part of this program was conducted by ██████████. ██████████ found this to be a very valuable Seminar generally, and he has started to apply some of the ideas he acquired. He will now be our authority on role-playing.
